Two versions of backrest available

MATERIALS

Frame: High resistant frame, manufactured using 6063-20 hardened aluminum with a thickness of 2.

Screws: Stainless steel that prevents the corrosion in marine environments.

Paintwork: Epoxy paint coating with anti-rust treatment and resistant to UV rays. Paintwork accordingly to the international standards specifications of Qualicoat, complies with the ISO 2409 and ISO 2360 about gloss retention and colour stability.

Accessories: Caps made of polypropylene (PP) with a UV protection.

BALLIU FABRIC

Breathable fabric constructed with double weft and double warp, 1.25 mm thick and 870 g/m² density.

Made of a continuous polyester thread core (30%) coated with PVC (70%).

Light resistance index 8.

Long-lasting anti-microbial protection, avoiding bad smells and stains caused by moisture.

Finished with a heat-setting process which prevents the fabric from tearing.

Made by means of thermal welding, to prevent it from tearing.

Fire retardant as per standard **EN-1021-2:2015**.

MAINTENANCE PLAN

Weekly: Visual check of the general condition of the product, removing dirt and ensuring there are no broken parts or damage that could be a danger to users.

Monthly: Check the correct robustness of the structure. Check the conditions of the anti-slip stops. Verify the screw conditions.

Yearly: Repair possible paint deficiencies. Replace the plastic caps and accessories that may be in poor condition.

Wintering and storage: Clean with soapy water and a soft cloth. Remove damp stains, sand and seawater. Store in a dry place in stacks of 4 units.

- Always use Balliu spare parts.
- Balliu does not manufacture parts for other brands.
- If the product is subject to heavy use, maintenance checks must be carried out more frequently.
- Do not use the product until maintenance is completed.
- Consult the maintenance instructions.
- Do not use aggressive chemicals to clean the product. Always use products with a neutral pH.
- Use a soft cloth to clean the product.
